factro® data security standards – review: 02.04.2019

Software technics

- web-based SaaS application, not vulnerable by local malware
- Standard browsers* and native iOS-/Android app as user clients
- Data transport protected by SSL encryption (TLS 1.2, ECDHE_RSA P-256, AES_256_GCM)
- modular software architecture with state-of-the-art cloud backend (nginx, node.js, PostgreSQL, Redis, ElasticSearch)
- redundand micro services for uninterruptible maintenance windows with automatic fail-over and load balancing
- integrated protection against XSS / SQL injection attacks
- 24/7 software monitoring of all relevant metrics

System technics

- regularly updated and hardened VMs on Ubuntu LTS distributions
- SSD storage with 2N or N+1 redundance
- Attachment file space based on S3 standard, logically separated per factro cloud
- separated VLANs for frontend and backend communication
- Hosting at Interxion Data Center Campus FRA-1, Frankfurt/Main, Germany
 - ISO/IEC 27001, ISO 22301, ISO 9001, ISO 14001, ISO 50001 and PCI DSS certified
 - Operations on ITILv3 standard
 - 24/7 secured and monitored
 - Dual Carrier Connect with 40 Gbit/s fiber backbones
 - direct access to DE-CIX
- Backup on geographically separated systems with database dumps, file archives and volume snapshots

*except Microsoft Internet Explorer
